Points of note: "The Undoing" is the debut CD by Organic!, but its members have been performing together for over 10 years. The band spontaneously improvises new music every time they play.

"The Undoing" is a studio CD with a live attitude. It captures the spirit of a live funk show with the sound quality of a classic studio recording. The album features both preconceived compositions and free improvisations.

The title "The Undoing" reflects Organic!'s improvisational approach to music. As they play, each musical idea inspires the next, creating a collage of sound and texture. Ideas become sections and sections become songs. They believe that their music is most essential when it happens organically.

Organic! has performed in and around New York City at clubs including: The Bitter End & The Living Room and in San Francisco at Bruno's.
